

Liquid Steel - Heavy Metal from Austria

Early days

Formed 2009 in Innsbruck, Austria, the band clearly knew it's goal – to create and play heavy metal music in the traditional style of their 80's-heroes.

The band released its demo record "Scream" including their first original material in 2012.

Album „Fire In The Sky“

The band's highly anticipated debut album, was released in 2014, containing 9 songs of both, variety and true heavy metal spirit. The reactions to the record have been phenomenal. "A record with much blood, sweat and tears and overt passion for 80s metal [...]"

(darkscene.at).

Renowned German producer Patrick W. Engel mixed and produced the band's first fulllength album.

Length: 40:27

Album „Midnight Chaser“

In 2016, the band recorded its second album "Midnight Chaser" keeping the metal spirit high, by combining high-pitched vocals, twin-guitar harmonies and blasting rhythms with a crystal-clear production. The album was recorded, mixed and produced by Jay Hundert at „Studio Hundert Records“.

Available as CD and vinyl.

Length: 46:06

Live

The band built up a dedicated fan base through passionate live performances. Some of the band's highlights were supporting the legendary NWOBHM band Diamond Head, Blaze Bayley, U.D.O. and sharing the stage with Skull Fist, Raven, Powerwolf and Iced Earth.

In April 2017 the band successfully did their first „Eastern Europe Tour“ playing concerts in Croatia, Serbia and Bulgaria.
